

LAVACORE

Lavacore is a technically advanced fabric, constructed and engineered exclusively for watersports requiring the ultimate in thermal control and superior comfort. This unique synthetic construction closely matches the stretch and movement of a traditional lycra rash vest, whilst providing the insulation qualities similar to that of a neoprene wetsuit.

OUTER-

lycra layer consists of a 180 g/sqm knitted nylon wrap knit Tricot with water repellent treatment to ensure fast water run off and anti wind-chill properties.

INTER-

layer is an impermeable and breathable, Microporous high stretch PU film which is wind-proof and allows perspiration to be drawn away

INNER-

"Polytherm" fleece layer that is a 240g/sqm, 4 way stretch polyester fleece with elastane. The anti-pill treatment as well as Anti Microbial reduces odour and eliminates bacteria.
